Name of the student: K.Bala Swapna

Year :2020-2021

Counseling by: Dr. Sk. Aktharunnisa Begum

Issue: Slow learner

K. Bala Swapna is a student at St. Joseph's College of education. She was a regular student who had to be little more progressive in her academics. She was noticed to be a slow learner comparatively. She seemed rather slow to understand the concepts taught in the class. The reason we came to this conclusion was that she often asked the same questions time and again in spite of repeated, detailed explanations and one-to-one personal care. This sort of behavior indicated to her slow and passive nature in learning. Notifying the fact of her grasping capacity of the subject Bala Swapna was advised to meet and take the personal guidance of Dr. Sk. Aktharunnisa Begum. As a result, K. Bala Swapna was taught some different methods and technicalities to be able to grasp the subject rather easily. The counselor proposed to her some innovative methods of self-learning that improve her focusing and concentrating abilities to be a competent learner herself. One such method proposed was to go through the subject before coming to the class, secondly, she was encouraged to pay complete attention and listen to the subject fully focused as if through any sort of distractions during the class and thirdly to go and repeatedly revise what she learnt at home.
