

St. Joseph's College of Education for Women, Guntur

Student Satisfaction Survey - A Report

2020 - 21

St Joseph's College of Education conducted a survey on the students about their experiences at college using goggle forms. The present study helps understand the learning experiences of the students through online. Students expressed their satisfaction regarding improved and advanced technical skills in their mode of learning. Students also expressed that they are ready to take up and adopt any new skills at present that help in their learning. The College wants to fill the gaps, if any, expressed and desired by the students.

The survey was conducted using Google forms. The survey was done on student teachers and M.Ed students. The following are the highlighted points of the survey.

- About 95% of the students expressed their satisfaction regarding uninterrupted classes through online.
- About 30% of the rural students expressed their satisfaction regarding the reach ability of the classes without stepping outside of their homes.
- About 90% of the students expressed their satisfaction about the steps taken by the teaching faculty to make their teachings innovative and interesting.
- About 97% of the students expressed their satisfaction and gratitude towards their faculty for resolving their problems and doubts.

Both teachers and students are coming up new ideas and plans to be implemented in their learning to make learning more interesting and adoptable.
